Support for New Region or New Protocol

Created by Suruchi Suruchi, last modified on Jun 13, 2022

Automation Toolkit can support new regions launched by OCI.

To do this modify file:

/cd3user/oci_tools/cd3_automation_toolkit/OCI_Regions; add new region in below format:

#Region:Region_Key

eg

langley:us-langley-1

You should use <Region> value in the CD3 excel sheet. Outdir for terraform will also be created with name as <Region>

Automation Toolkit can support new protocols in SecurityLists or NSGs.

To do this modify file:

/cd3user/oci_tools/cd3_automation_toolkit/OCI_Protocols; add new protocol in below format:

#protocol number:protocol name

No labels
